No more programming, no more constantly changing the temperature. The Nest™ Learning Thermostat™ programs itself in a week to keep you comfortable and save energy.

VISIT THE STORE

(<https://web.archive.org/web/20120103213712/http://store.nest.com/>)

If you're comfortable installing a light fixture, you can install Nest. If not, you can buy Nest with installation from nest.com or call 855-4MY-NEST for more info.

First answer a few basic questions. After that, Nest will learn when you change the temperature.

Day 1

Day 2

Nest will do what you tell it, so teach it energy saving habits: turn the temperature down at night or when you leave the house, and don't turn the temperature too high or low.

Day 2

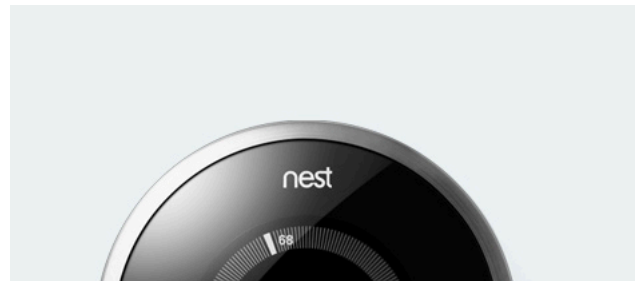

Day 6

Energy saving features like **Auto-Away™** and **Energy History** will become available as Nest learns.

Auto-Away turns heating and cooling down automatically when no one is home, saving energy when you don't need it. Energy History shows you how much energy you've used daily.

Day 6

Day 7

The Nest Leaf appears when you're saving energy. Changing the temperature just one degree can cut your energy use up to 5%. The Leaf guides you in the right direction.

How Nest saves energy

Day 7

Day 8

By now, Nest has made a schedule for your home. One-off temperature changes won't confuse it, but change the temperature a couple of days in a row and Nest will catch on and adjust its schedule. Lower the temperature two Mondays in a row and Nest will remember for next week.

7:45am

10:20am

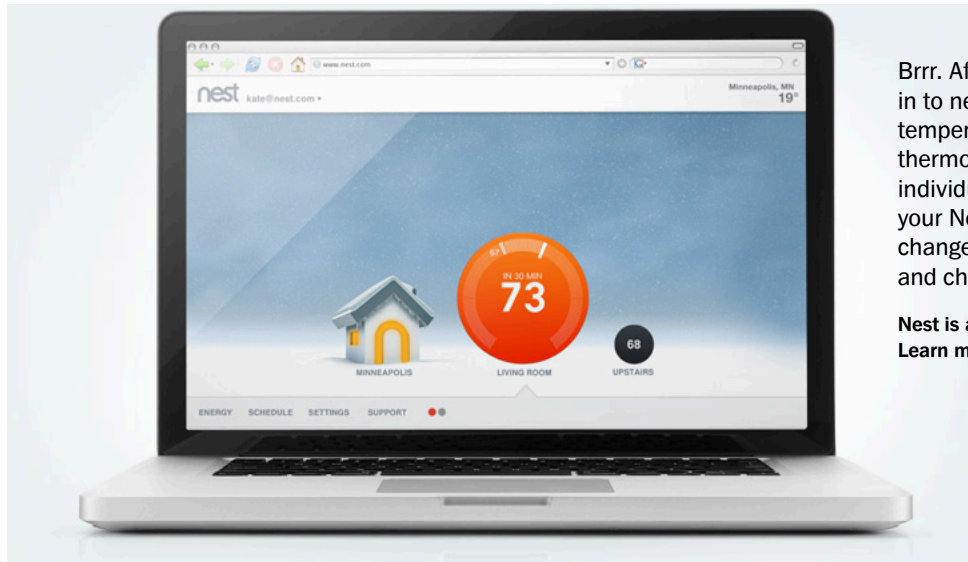

6:15pm

8:15pm

10:45pm

Day 8

Day 12

Brrr. After an unseasonably cold day, you log in to nest.com from the office to adjust the temperature at home. If you have multiple thermostats, you can view and manage each individually from one Nest Account. When your Nest is connected to Wi-Fi, you can change the temperature, adjust your schedule and check local weather from anywhere.

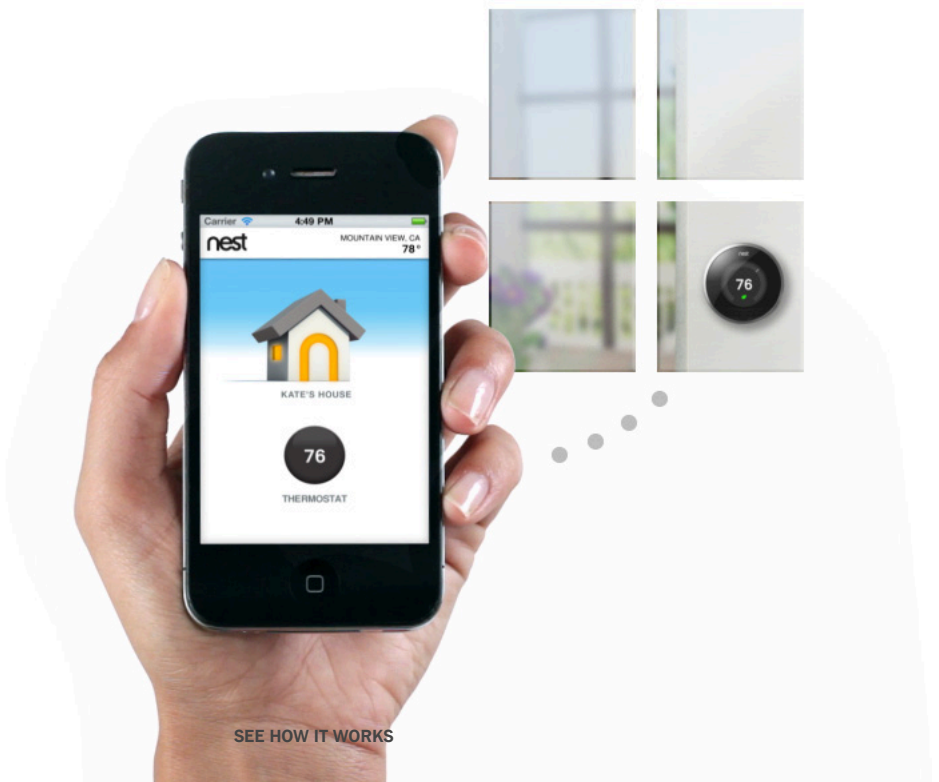

Nest is always connected
[Learn more](#)

Day 12

Day 20

Use the Nest Mobile app to connect to your thermostat from a smartphone. Getting in early? Change the temperature miles from home.

Access Nest from anywhere

[SEE HOW IT WORKS](#)

Day 20

Day 90

Now that summer's here, temperatures are rising. So switch Nest from orange "heating" to blue "cooling". What you wanted in winter and spring no longer applies, so Nest will start building a new schedule, just like it did in your first week. Once again, show Nest what you like and teach it good habits, and Nest will keep you cool all summer long.

Day 90
Day 365

If you teach Nest well, you'll see the savings on your energy bill. And since Nest is always learning and improving, you can expect the savings to continue.

Day 365

Our thermostat is \$249 and will ship soon.
