

Support for Works with Nest has ended

As of September 29, 2023, Works with Nest (WWN) connections no longer work. You can continue to automate your home through Works with Google Home (WWGH) by creating Routines in the Google Home app's "Automations" tab or script editor, available now in Public Preview.

Moving to Works with Google Home

[Expand all](#)[Collapse all](#)

Moving to Works with Google Home starts with a Google Account [^](#)

If you want to use your Nest devices with WWGH, the [script editor](#), or Amazon Alexa, you must [migrate your Nest account to a Google Account](#). Once completed, migration isn't reversible.

Migrating to a Google Account will give you the benefit of a single account, seamless experiences, and the ability to align homes and home members across the Nest and Google Home apps. You'll also have access to new features that'll be available with a Google Account, the Google Home app, and the WWGH program.

We recommend you read this entire article and the [FAQs about accounts for the Nest app](#) before you migrate your Nest account and associated data to a Google Account.

Once you've migrated your account, you'll need to [connect your WWGH devices in the Google Home app](#).
